Directors
 Each directorship would apply to a specific disability and that person would be the "Designated Advocate or Expert".
 As we get more group members we will get a larger more diverse Directorship.
 EG. Visible Disability... Wheelchair. Someone who uses a wheelchair has the knowledge of the daily difficulties that arise from living in that situation. They would be able to help point someone who is new to that situation, in the right direction to solve particular problems that might occur for them. They may also know of grants that they themselves recieved for home improvements or other supports that the average person might not know of.
